bard to the future

Words fail the pure sadistic rage of the bugs we have encountered. Even by restarting the game, the bugs continue to stay throughout. The walls. How do I put this. Sometimes, there are none. Spears and tridents fly and fly and fly and fly and then when someone gets up, you will die if you do not "pounce" to the ground immediately after releasing these atrocities from hell. Another problem seems to be the uh, "trajectory" of these flying objects. My body is a magnet and metal sears through my core. More often than not, objects will target you out like a magnet to metal. (See what i did there). They will not stop until someone is dead. The "short sword," not sure on actual name, has the range of a spear or any weapon of similar length. It does not seem to make contact but some magical blast of energy knocks ya on ya bum. and then you die. Jeremy entered a rage induced coma, but very good game otherwise, hilarious even if not the intent. 10/10 but fix some bugs please for the love of all things holy it can only help.. The game is really annoy when socialising with a bunch of annoy survivors. I don't know what I'm playing or why I keep getting achievements, but I know it's something I must do somehow and quitting is not an option.. Most of the puzzles are simple but some of them took me a while. Enjoyable graphic, music and gameplay. I like tetrislook pieces if you are bored and want to try something simplier this game is for you. +/-6h to get 100% achievs.. Concept is somewhat boring, no major difference between this and those Hole.io games.. It's a prototype, but it got cool ideas, need to try the chapter games :O 7/10

Wow....Five Interesting Airfields included!. I can give a buy recommendation for all dlcs, but they are not necessary at all costs.. this game i want my money back and i wasted money on this and time. very quick review after a very quick go, realise not played for long. The problem I have is I bought this for the multi player option that The Gold Club VR doesn't have. But the golf club is a much much better golfing experience. After playing that today then switching to this, really disapointed. I would not recommend.. What can I say? It's my baby, my home, my life, my love. It's good, buy it.. This is pretty awesome.

At least in the tutorial you feel incredibly powerful; it slacks off a little bit but the game is awesome.

I'll extend my review after I've played more, but so far so good; really enjoying this.

There have been lots of 'omg too cool' moments.. Bearing in mind that this is the first offering since Beat, the software is looking very positive. Added my Movies and TV shows from the deck. I'd like to see more options with regard to the different libraries that I have, and a few simple tidy ups. The interface works pretty well, although it took a few minutes to get used to "flinging" the DVD case like film at the TV to run it. I'd like to see how well it does with side by side, but I'll get around to that at some point.

Some added functionality would make this a really nice option while the wife is watching her TV.

Liking the first release though.. Exactly the same as the other two but with different colours.
